Profile

AI Engineer with expertise in Machine Learning, Deep Learning, Natural Language Processing, and Computer Vision, currently pursuing a Master's in Data Science. Working as a Data Scientist at the National Bank of Egypt (NBE), contributing to projects that enhance efficiency and customer experience through Predictive Models for risk assessment, customer behavior analysis, and operational optimization. Passionate about leveraging AI to drive innovation and enable data-driven decision-making.

Education

Master Degree in Data Science

Cairo University

October 2024 – Present

Information Technology Institute (ITI)

9 Months Professional Training Program(PTP)

Track: AI & ML

October 2023 – June 2024

Faculty of Computer And Artificial Intelligence (FCAI)

Bachelor's degree

Final grade: Very Good With Honer

Helwan University

October 2019 – June 2023

Experience

Data Scientist & ML Engineer

National Bank of Egypt (NBE)

August 2024 – Present

Full-time

Data Science Instructor

Epsilon AI

June 2024 – August 2024

Part-time

Sample Projects

Signature and Document Verification and Validation

Internal Project

National Bank of Egypt

Automated signature, amount, and serial verification on cheques using OCR, image processing, and Siamese Networks for accurate signature matching.

Cross-Selling Recommender System for Platinum and Payroll Customers

Internal Project

National Bank of Egypt

Developed a cross-selling solution for personal loans and credit cards targeting platinum customers, covering data preparation, feature engineering, model development, and production deployment. Built classification models to predict customer propensity and successfully deployed the solution to production.

Hyperspectral Change-Detection-Based-On-Modification-of-UNet-Neural-Networks

Supervised by: [NARSS](#)

[\(GitHub\)](#)

Collaborated with the National Authority for Remote Sensing Space Sciences (NARSS) to develop multiple modifications of UNet neural networks tailored specifically for hyperspectral change detection with the aim of detecting changes in the North Coast of Egypt.

LLM Fine-tuning for Fashion Trends Spotting

Supervised by: [Twenty Too](#)

ITI Graduation Project

[\(GitHub\)](#)

Built a system to crawl fashion brand pages, perform sentiment analysis on comments, and fine-tuned Pirt (LLM) for multi-class comment classification.

Courses and Certifications

AWS Machine Learning Foundations Amazon	April 2024 – May 2024
AWS Cloud Foundations Amazon	March 2024 – April 2024
Databases and SQL for Data Science with Python IBM	January 2024- February 2024
Certified Data Scientist Professional Epsilon.AI	March 2023- November 2023
TensorFlow: Advanced Techniques Specialization Coursera	December 2022-November 2022
TensorFlow Developer Professional Certificate Coursera	August 2022-October 2022
SQL for Data Analysis Udacity	April 2021 - October 2021
Data Analysis Challenger Udacity	January 2021- April 2021
Competitive Programming	Coach Academy January 2020 – April 2020

Trainings

AI & ML Summer Training	ITI June 2023 – July 2023
-------------------------	------------------------------

Technical skills

Programming: Python, R, C, C++, Java	Frameworks: Keras,Scikit-Learn,TensorFlow,OpenCV
Libraries: Pandas,NumPy, NLTK, Optuna, Beautifulsoup ,Selenium	Data Visualization: Power BI, Seaborn, Matplotlib, Plotly
Time Series Forecasting, ARIMA, SARIMA, LSTMs	Big Data: Hadoop, Hive, PySpark
Deep Learning: CNN,NLP,RNN,LSTM,LLMs,RAGs, Generative AI	Recommender Systems: Collaborative Filtering, Factorization Machines, Surprise
Data Science: Data Preprocessing, Feature Extraction and Engineering, Extract Transform Load (ETL), Model Selection and Evaluation,Deployment, MLOp	Other: Docker,Web Scraping,Random Search Optimization,Git, MLOPs, Quantum Computing, Agile,Bash Scripting

Soft Skills

Leadership Problem-Solving High Level Of Adaptability	Communication Skills Flexibility presentation Skills
---	--

Volunteering

Head of Data Science	Vision Student Organization October 2022- June 2023
Spearheaded the development and implementation of educational material, Teaching fundamental Data Science including Mathematics, Exploratory Data Analysis (EDA), Data Visualization, and Machine Learning
